

U. S. SENATOR FROM SOUTH CAROLINA Recommends Pe-ru-na For Dyspepsia and Stomach Trouble

Ex-Senator M. C. Butler.

If you do not derive prompt and satisfactory results from the use of **Pe-ru-na**, write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address: Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

Catarrh of the Stomach is Generally Called Dyspepsia—Something to Produce Artificial Digestion is Generally Taken.

Hence, Pepsin, Pancreatin and a Host of Other Digestive Remedies Has Been Invented.

These Remedies Do Not Reach the Seat of the Difficulty, Which is Really Catarrh.

EX-Senator M. C. Butler from South Carolina was Senator from that State for two terms. In a recent letter to The **Pe-ru-na** Medicine Co., from Washington, D. C., he says:

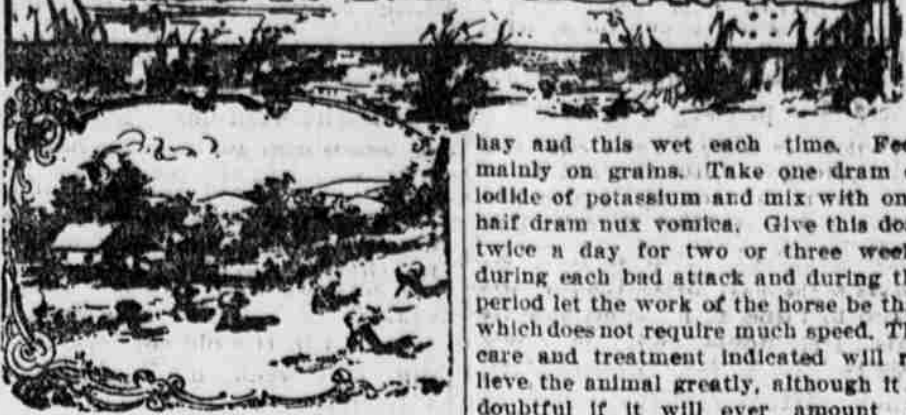

"I can recommend **Pe-ru-na** for dyspepsia and stomach trouble. I have been using your medicine for a short period and I feel very much relieved. It is indeed a wonderful medicine besides a good tonic."—M. C. Butler.

The only rational way to cure dyspepsia is to remove the catarrh. **Pe-ru-na** cures catarrh. **Pe-ru-na** does not produce artificial digestion. It cures catarrh and leaves the stomach to perform digestion in a natural way. This is vastly better and safer than resorting to artificial methods.

Pe-ru-na has cured more cases of dyspepsia than all other remedies combined, simply because it cures catarrh wherever located. If catarrh is located in the head, **Pe-ru-na** cures it. If catarrh has fastened itself in the throat or bronchial tubes, **Pe-ru-na** cures it. When catarrh becomes settled in the stomach, **Pe-ru-na** cures it, as well in this location as in any other.

Pe-ru-na is not simply a remedy for dyspepsia. **Pe-ru-na** is a catarrh remedy. **Pe-ru-na** cures dyspepsia because it is generally dependent upon catarrh.

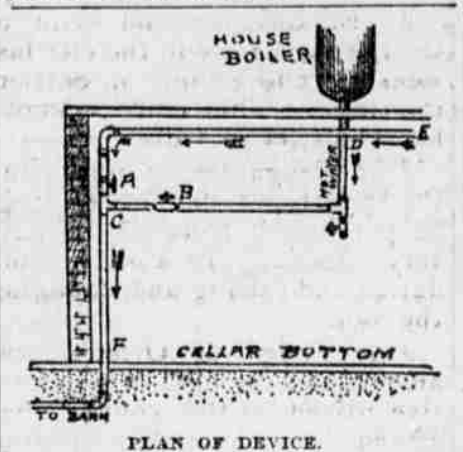

AGRICULTURAL

Water-Heating Device.

The subjoined diagram, taken from Orange Judd Farmer, illustrates how easily water can be warmed in a small way where both house and barn are furnished with running water and moderate plumbing arrangements. The pipe marked E F, running through the house cellar, furnishes water to the house and barn. By means of two short pipes, C D, the pipe from the hot water boiler in the house is connected with the pipe E F, which, as before stated, supplies the barn with cold water.

Then all that is necessary to fill the barn tub with warm water is to open the valve B and shut valve A, thus letting the warm water from the house boiler into the pipe which goes to the barn and shutting off the flow of cold.

This clever little scheme has worked successfully on an up-to-date farm in Amherst, Mass., and has furnished warm water to four cows and two or three horses for several winters. The only objection is that the good housewife sometimes objects to having her supply of hot water exhausted two or three times a day.

Rights of Sheep Owners.

On the trial of an action brought by Agnes Smith against George Wetherill in the Oneida County, New York, court, to recover damages for the alleged unlawful killing by the defendant of her dog, the evidence showed that the animal was shot on premises adjoining those owned by Wetherill, after he had been chasing sheep. The defendant asserted that he was justified in shooting the dog under a statute which provided that any person may kill any dog which he shall see chasing, worrying or wounding any sheep. The trial justice charged the jury, as a matter of law, that the statute was not a defense, because the dog was not chasing or worrying or wounding any sheep at the time he was shot. The fourth appellate division, on an appeal for a verdict against Wetherill, has decided that the charge was erroneous. "At common law," said Justice Nash, for the court, "a dog might be killed in defense of or when necessary for the protection or preservation of property. The statute goes further. It provides for the killing of a dog that wrongfully chases, worries or wounds sheep. If it does these things, it must be killed."—American Cultivator.

King of Angoras.

America has developed an Angora buck of the highest quality, which is a great victory for those who claim that we can breed as good stock as can be found in Turkey or South Africa. Last year was Turkey by D. C. Taylor of Lake Valley, N. M., and was the champion at the recent Kansas City show. He was sold at auction to Col. C. S. Rich.

LAZARUS.

son of Dubuque, Iowa, for \$700, the record price for an American bred Angora.

Relieving a Flogging Horse.

Most farmers are familiar with the horse who puffs and wheezes at its work. The disease is technically known as "roaring," and is said to be similar to asthma in humans. There is really no cure for it, but the trouble may be greatly alleviated by treatment and especially by proper feeding. If the disease is not so deeply seated that the animal cannot do farm work, the feed should consist of little

hay and this wet each time. Feed mainly on grains. Take one dram of iodide of potassium and mix with one half dram nuxvomica. Give this dose twice a day for two or three weeks during each bad attack and during the period let the work of the horse be that which does not require much speed. The care and treatment indicated will relieve the animal greatly, although it is doubtful if it will ever amount to much for steady work.—Indianapolis News.

Good Oats.

Good oats are clean, hard, dry, sweet, heavy, plump, full of flour, and almost metallic luster. Each oat in a well-grown sample is nearly of the same size. There are but few small or imperfect grains. The hard pressure of the nail on an oat should leave little or no mark. The kernel, when pressed between the teeth, should split rather than tear. The skin should be thin. The size of the kernel will be less in proportion than the skin is thick. The color of the oat is not very material, but white oats are generally thinner in the skin than black. Again, black oats will grow on inferior soil. Short, plump are preferable to large long grains. Bearded oats must have an excess of husk. Oats are not necessarily bad because they are thick-skinned or bearded, but they must contain a less amount of flour per bushel than the thin-skinned oats not bearded.

A Good Whitewash.

Two kinds of ordinary whitewash may be used to advantage, prepared in the following manner: For inside work, to a bucketful of ready linewash add one pint of soft-boiled rice and a quarter of a pound of white glue, dissolved thoroughly and mixed through the mess. For outside substitute in place of rice and glue (to each pail of whitewash) a pound of common rock salt, dissolved in boiling water. Thus mixed and applied upon a bright, sunny day, the whitening will remain permanent in color and will not rub off readily, while the application to the interior will destroy the lice that may be secreted in the rough wall and crevices of the inside of the poultry house and stables, if the wash be generously distributed.

A Desirable Door Lock.

Large barn doors are often fastened to a perpendicular bar, one end of which enters a mortise in a beam or block overhead and the other a mortise in the floor. The strength of a man is usually required to take out the bar, or put it up. The illustration shows a more convenient way to manage the crossbar. A round iron bolt holds the bar to the middle rail of the door, allowing it to turn freely either way. Two long gains, one in the door and one in the beam overhead, receive the ends of the bar when the door is closed. In place of a gain in the beam, a strip of scantling may be nailed firmly to the under side of the beam. The upper end of the crossbar, when set erect, comes on the inside of the strip.—D. H. Shepard in Farm and Home.

Tips for Creameries.

Milk cans should be washed and sterilized with steam at the factory, and some other receptacle should be used to return the skim milk or whey to the farm. If the cans are used for this purpose they should by all means be emptied as soon as they reach the factory, thoroughly washed and scalded, and placed on a rack in an inverted position with the covers off.

Dairy Education.

A. W. Trow, the prominent farmer, creamery man and agricultural writer of Glenville, Minn., has recently been made a member of the educational staff of the dairy and food department in his State. His work will be very largely of an educational nature and among the farmers and dairymen. The \$30,000 annual appropriation recently voted by the Legislature, to gather with the improved and amended dairy laws just secured, give Minnesota splendid facilities for aiding in the most effective way her great dairy and creamery interests.

In Fly Time.

A gallon of kerosene, a quart of fish oil and an ounce of carbolic acid is one of the cheapest and best home-made mixtures for keeping flies from cattle. It should be applied every morning after milking, using a good-sized hand sprayer, paying especial attention to the head, shoulders and fore legs. Spraying for flies is absolutely necessary to keep up the full flow of milk in hot weather.

London has some houses, built of timber, which it is claimed are as good as when erected over 200 years ago.

OLD DAYS IN OKLAHOMA.

Governor Ferguson's Reminiscences of Hunting in Buffalo Country.

"This is the time of year in Oklahoma when a man feels something pulling him into the open country," said Governor Ferguson, who is a frontiersman by preference and a pioneer by instinct. His father went from Iowa to Kansas when game was abundant everywhere, and became one of the most successful hunters in the Southwestern country. When a small boy Governor Ferguson was his father's companion on many expeditions into Oklahoma and Indian Territory.

"I do not suppose that I shall ever overcome the keen regret that is felt in thinking of the old days that are gone forever," said Governor Ferguson. "Oklahoma seems lonesome to me now when I travel over it and pass constantly in sight of towns and farm houses where once I saw nothing but the prairies, the hills, and the timbered streams. It was my delight to ride as the crow flies—straight across the country, unobstructed by wire fences and section-line highways. Spring was a glorious season. The air was fresh and pure, the earth mantling with green and brilliant with flowers, and the sun just far enough north to thaw the winter sluggishness from a man's blood and set every nerve tingling with happiness. The plaintive note of a meadow lark always makes me homesick and brings back to me a vision of the prairies. It was no less enjoyable to ride in the big timber in the river bottoms, musical with the songs of countless birds. The song of what we called the 'sugar writer' bird, probably the tobeo, had a melancholy sweetness that makes a man's heart thump even now.

"I went with my father on many hunting trips from Chautauque county, Kansas, into Oklahoma. The regions between the South Canadian river and the Smoky Hill was the best buffalo country in the West. Along the Salt Fork in Northern Oklahoma I have seen buffalo as far as the eye could reach. We came often in the fall, with ox teams, and returned with our big wagons loaded with winter meat. We camped one afternoon at Buffalo Springs, just north of Hennessey, and turned our oxen out to graze, without unyoking them. They began snorting, and fearing a stampede, we chained them to our wagons. We looked everywhere for the cause of alarm, but could see nothing. In about ten minutes a low, rumbling sound, like deep, far-off thunder, came from the west, where clouds of dust were rolling high in the air. We knew that a herd of buffalo was coming. Almost before we could realize it, the herd was upon us, rushing headlong for the springs, where they crowded upon each other in a mad frenzy for water. Their tongues protruded as if they had been pursued by hunters, which was probably true. We killed nine, all we needed, in a short time.

"It may be unwise to destroy traditions, but the story that Pat Hennessey is buried in the town of Hennessey is untrue. Hennessey was buried near Buffalo Springs, and I saw his grave within a year after he was killed, and many times afterward in driving cattle up the trail. The grave was marked by a stone on which was 'P. H., 1874.' If I remember correctly, the year of his death."—Guthrie (Ok.) Correspondence Kansas City Star.

UNIQUE BIRD EXHIBIT.

St. Louis Fair Now Has One of the Most Intriguing in Existence. Frank M. Chapman, the bird man of the American Museum of Natural History, has made a remarkable picture for the bird exhibit at the St. Louis World's Fair.

There is a glistening stretch of real beach sand arrayed with a background of painted beach and painted sea so natural that you can almost hear the waves ripple. Tufts of beach grass and stray clumps of beach goldenrod actually growing in the sand and many shells are supplemented by pictured grass and bushes so that the two blend and produce a most realistic scene.

But even more natural than the setting are the groups of birds, the habits, growth and appearance of which the whole thing is intended to show. The exhibit has just been opened and is the most striking in the museum.

The locality represented is Cobb's Island, a shell-covered sand reef seven miles long about seven miles off the Virginia coast.

Mr. Chapman visited Cobb's Island last July in the nesting season and camped out for days behind a screen of banked-up sand, armed with a camera. These six specimens are represented by the stuffed specimens: Least tern, gull-billed tern, common tern, skimmers, Wilson's plover and oyster catcher.

In addition to the full grown birds shown in flight or nesting, says the St. Louis Post-Dispatch, are the young, the eggs and the rude circle of shells which the sea birds heap together for nests.

His Trouble.

"Literature may be a great thing," said the sad looking man, "but if I hadn't been a man of letters I would have had less trouble." "Indeed?" queried the casual acquaintance.

"Yes, I wouldn't have been mixed up in a breach of promise suit."—Philadelphia Ledger.

Method in His Rashness.

Tom—Why were you so determined a kiss that plain cousin of yours? Dick—I wanted to establish a precedent. She has two pretty sisters, you know.—Stray Stories.

All men are born equal, but some grow up and become presidents or baseball umpires.

Fibroid Tumors Cured.

Note the result of Mrs. Pinkham's advice and medicine.

"Some time ago I wrote to you describing my symptoms and asked your advice. You replied, and I followed all your directions carefully, and today I am a well woman."

"The use of Lydia E. Pinkham's Vegetable Compound entirely expelled the tumor and strengthened my whole system. I can walk miles now."

"Lydia E. Pinkham's Vegetable Compound is worth five dollars a drop. I advise all women who are afflicted with tumors or female trouble of any kind to give it a faithful trial."—(Signed) Mrs. E. F. Hayes, 252 Dudley St., (Roxbury) Boston, Mass.—\$5000 forfeit if original of above letter proving genuineness cannot be produced.

Mountains of gold could not purchase such testimony—or take the place of the health and happiness which Lydia E. Pinkham's Vegetable Compound brought to Mrs. Hayes.

Such testimony should be accepted by all women as convincing evidence that Lydia E. Pinkham's Vegetable Compound stands without a peer as a remedy for all the distressing ills of women; all ovarian troubles; tumors; inflammations; ulceration; falling and displacement of the womb; backache; irregular, suppressed or painful menstruation. Surely the volume and character of the testimonial letters we are daily printing in the newspapers can leave no room for doubt in the minds of fair people.

Somehow a man always has a lingering doubt or two when a woman says, "I want you to understand that I am a lady!"

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure it, sent the afflicted to the hospitals, where they were treated with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75c.

Hall's Family Pills are the best.

Some men are liberal in all things but religion and politics.

Ask Your Dealer for Allen's Foot-Ease. A powder to shake into your shoes. It cures the feet. Cures Corns, Bunions, Swollen Feet, Hot, Chapped, Itchy, Sweating feet and Ingrowing Nails. Allen's Foot-Ease makes new or tight shoes easy. Sold by all druggists and shoe stores. 25c. Sample mailed FREE. Address: Allen S. Olmsted, Le Roy, N. Y.

There are people in this world who insist on thinking that the self-made man who has the goat is merely trying to show off.

Don't get the idea into your head that woman is more economical than man just because her waist is smaller.

It is taking an unfair advantage of Russian to ask him to pronounce his name when he has been drinking.

In 1850 only one woman worked for wages to every ten men; now the ratio is one woman to form.

Men make themselves weary by combating opinions which mean nothing.

Just because two men have an understanding between them, they are necessarily half-witted.

Cats are licensed in Berlin, and every cat in that city must wear a banded badge bearing a number.

A BACK NUMBER.

The Milk and Egg Diet.

Starving the patient who has a sick stomach is an out of date treatment and no longer necessary with the predigestion and nourishing food Grape-Nuts that the weakest stomach can handle and grow strong upon.

There is plenty of proof of this: "I had suffered from stomach trouble for six years and for most of the last two years had been confined to my bed, the trouble having become chronic in spite of the very best medical attention. I had always been a coffee drinker, but for the past year I could not drink it at all because it made me so nervous I could not sleep and my appetite was almost entirely gone.

"Then some friend advised me to try the predigestion food Grape-Nuts and about three months ago I did so and since that time my improvement has been so rapid that my customers and friends are astonished and every day someone remarks upon my changed condition. I have gained 15 pounds, sleep well, my appetite is good and my digestion is perfect. Where I have lived on milk and light diet for years I now eat most anything I want and don't suffer any inconvenience either. The way Grape-Nuts food has built up my stomach and strengthened my nervous system particularly is just wonderful.

"I drink your food drink Postum, too, and no longer feel the want of coffee. There is absolutely no doubt that leaving off coffee and using Grape-Nuts and Postum has brought me out of my bed from an invalid back to fine health." Name given by Postum Co., Battle Creek, Mich.

"There's a reason," and that reason is plain to anyone who will spend a few minutes investigating in the interest of health.

COMPULSED TO USE A CRUTCH FOR EIGHT MONTHS. DOAN'S KIDNEY PILLS CURED MRS. P. CONLIN, CARBONDALE, PA.

Mrs. P. Conlin, 88 Greenfield Avenue, Carbondale, Pa., says: "I suffered with backache, and, despite the use of medicines, I could not get rid of it. I was compelled to use a crutch for eight months, and a part of the time was unable to walk at all. I fairly screamed if I attempted to lift my feet from the floor, and, finally, I lost control of my limbs through weakness, as I could neither bend nor straighten up to my full height, and if ever a woman was in a serious condition, I was. My husband went to Kelly's drug store and brought home a box of Doan's Pills. I felt easier in a few days, and, continuing the treatment, I
